

U.S. Serial No. 10/650,851

ASA-1151

REMARKS

The Applicants' representatives thank the Examiner and her supervisor for the courtesies extended during the Office Interview conducted on December 14, 2005. The foregoing amendments have been made to improve the form of the claims and to more clearly distinguish the claimed invention from any combination including Manley et al., U.S. Patent Publication No. 2003/0195903 (of record), pursuant to the discussion that took place during the interview (please see the Interview Summary in which the Examiner states that the proposed amendments to include pairing information indicating the possibility/impossibility to choose the destination volume, overcome Manley).

The undersigned invites the Examiner or her supervisor to telephone him at the number below to discuss any aspect of the application.

Respectfully submitted,

Daniel J. Stanger  
Registration No. 32,846  
Attorney for Applicants
